

**The Tenth Symposium on Arid Climate Change and
Disaster Reduction
& Sino-US Workshop on Drought Monitoring, Early-
Warning and Numerical Modeling**
July 25-26, 2016, Lanzhou, Gansu, P. R. China
(First Circular)

In order to further strengthen the international information exchange on drought research progress and also to promote the innovative research on arid meteorology, the '10th Symposium on Arid Climate Change and Disaster Reduction' & 'Sino-US workshop on Drought Monitoring, Early-Warning and Numerical Modeling' will be held in Lanzhou, Gansu, China, 25-26 July, 2016.

Symposium Themes

- Arid climate change
- Arid meteorological and ecological environment monitoring experiments
- New progress on drought monitoring, forecasting and early-warning
- Regional climate models and numerical weather models over arid areas
- Land surface processes and modeling
- Supporting technologies for drought data.

Host

- Institute of Arid Meteorology (IAM), CMA, Lanzhou
- Committee of Arid Meteorology, Chinese Meteorological Society
- Key Laboratory of Arid Climate Change and Disaster Reduction, CMA
- Key Laboratory of Arid Climate Change and Disaster Reduction of Gansu Province
- Gansu Meteorological Bureau (GMB), CMA

Sponsors

- China Association for Science and Technology (CAST)

- Institute of Arid Meteorology (IAM), CMA, Lanzhou
- Key Laboratory of Arid Climate Change and Disaster Reduction, CMA

Symposium Language

English & Chinese

Important Dates

- 30 June, 2016** Abstract submission deadline
10 July, 2016 Announcement of Symposium/Workshop program
25-26 July, 2016 Symposium/Workshop
