

The Eleventh Symposium on Arid Climate Change and Disaster Reduction & Workshop on Drought and Regional Water Cycle

June 4-6, 2017, Lanzhou, Gansu, P. R. China

(First Circular)

In order to further strengthen the international information exchange on drought research progress and also to promote the innovative research on arid meteorology, the '11th Symposium on Arid Climate Change and Disaster Reduction' & 'Workshop on Drought and Regional Water Cycle' will be held in Lanzhou, Gansu, China, 4-6 June, 2017.

Symposium Themes

- Mechanisms and early warning of drought disasters
- Climate change, meteorology and ecological environment observation experiment in arid area
- Regional climate model and weather model in arid area
- Land-atmosphere interaction in arid area

Host

- Institute of Arid Meteorology (IAM), CMA, Lanzhou
- Met Office Hadley Centre
- The Institute of Atmospheric Physics, Chinese Academy of Sciences
- Gansu Meteorological Bureau (GMB), CMA

Sponsors

- China Drought Meteorology Scientific Research Project (CDMSRP)
- Climate Science for Service Partnership(CSSP)

Symposium Language

English & Chinese

Important Dates

4 May, 2017 Announcement of Symposium/Workshop program

4-6 June, 2017 Symposium/Workshop
